

Moving Forward. Kicking Back.

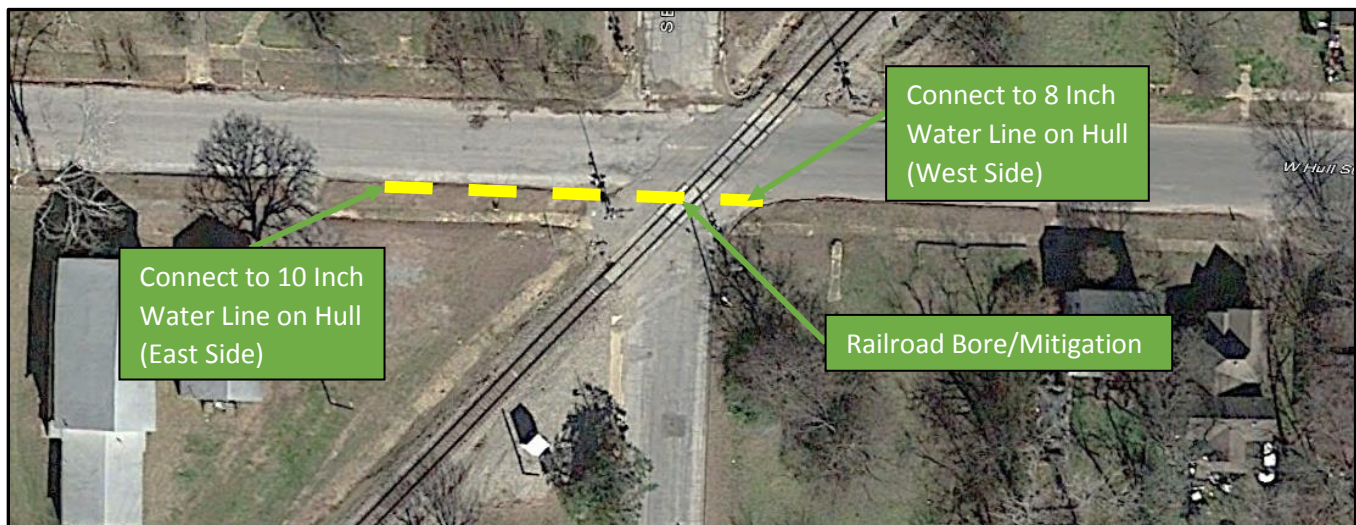

## 2021 Water Line Improvements

**PLAN OVERVIEW** The 2021 Water Line Capital Improvement Plan consists of replacing one deteriorated water line and connecting two existing lines (water line on East & West Walker and looping water lines on West Hull). These projects are prioritized by the existing water line condition, frequency of failure, and coordination with the Pavement Management Plan. One of the goals of the Water Line Capital Improvement Plan is to increase the water pressures and water quality throughout the City by replacing the older cast iron water lines with new polyvinyl chloride (PVC) water lines.
