

Moving Forward. Kicking Back.

# Lake Texoma Pump Station Replacement

**PROJECT OVERVIEW** The long term outlook for growth of Denison is anticipated to necessitate a new water supply from Lake Texoma. The original Texoma Pump Station has reached its useful life and its capacity limited. A new station is needed that will provide the water demands as the City continues to grow. This size of project will require substantial planning, design and coordination with the U.S. Army Corps of Engineers.
